Orthopedic Series: Shoulder Arthroscopy

Coders encounter several challenges with reporting shoulder arthroscopy CPT codes such as understanding the acronyms (e.g., SLAP) and eponyms (e.g., Mumford, Bankhart) used to describe these procedures or distinguishing between an arthroscopic vs. an open procedure. We will describe shoulder anatomy and explore the coding challenges associated with these arthroscopic procedures.

Join **The Coding Group's** live audio conference/webinar on **Thursday, June 26, 2008**, from 10:00 a.m. to 11:00 a.m. Pacific.

This training session will provide attendees with a clear understanding of the following:

- ✓ Describe shoulder anatomy
- ✓ Define shoulder arthroscopy
- ✓ Describe shoulder arthroscopy procedures
- ✓ Review modifiers used with shoulder arthroscopy procedures

Who should attend?

- ✓ Outpatient coders
- ✓ Reimbursement analysts
- ✓ Outpatient coding auditors
- ✓ CDM analysts

Meet our esteemed speaker!

Sheldrian Leflore, CPC

Ms. Leflore is a revenue management educator with The Coding Group. Her specialty consulting experience includes cardiology and interventional radiology. Her experience also includes physician office operations management, financial analysis, and medical coding and billing education. She is an approved Professional Medical Coding Curriculum instructor. As a national presenter for the American Academy of Professional Coders, Sheldrian tours the country speaking on cardiology and interventional radiology coding and reimbursement.
